SUMMARY

QA Automation Engineer with 2+ years of experience in manual and automated software testing, complemented by hands-on software development experience. Experienced in Selenium-based test automation using Python and JavaScript, with additional project experience using Playwright and Appium. Proficient in API testing, regression testing, test case design, debugging, and collaborating with developers and end users to improve software reliability.

WORK EXPERIENCE

Ecological Energy Technologies Inc. Developer	Quezon City, Metro Manila September 2024 - September 2025
- Developed and maintained internal web applications that automated daily office tasks and improved operational efficiency. - Developed Python-based automation tools that streamlined data processing for electrical engineers and analysts, reducing manual reporting effort and improving their turnaround time. - Performed functional testing, debugging, and validation of internal web applications to identify defects and improve application stability - Collaborated with end users to troubleshoot issues, refine features, and ensure applications met operational requirements.	

ZANK POS Enterprises Technical Staff / Quality Assurance	Concepcion, Baliwag, Bulacan July 2023 - July 2024
- Designed and executed manual test cases for new features, regression testing, and pre-release validation. - Automated manual regression test cases using Selenium with Python and JavaScript, reducing repetitive testing effort and accelerating release validation. - Performed functional, regression, compatibility, and integration testing to identify defects before production releases. - Investigated application, database, and hardware issues and collaborated with developers to troubleshoot and resolve defects. - Gathered and translated user feedback into documented defects, requirements, and potential product improvements.	

TECHNICAL SKILLS

- Testing and Automation:** Selenium, Playwright, Appium, WinAppDriver, PyAutoGUI, Postman, Manual Testing, Test Automation, Regression Testing, API Testing, Functional Testing, UI Testing, Test Case Design, Test Planning, Defect Tracking
- Programming Languages:** Python, JavaScript, Java, C++, PHP
- Databases & Cloud:** SQL Server, AWS
- Tools & Platforms:** Git, GitHub, Bitbucket, Jira, Microsoft Office

EDUCATION

- Bachelor of Science in Information Technology** | Bulacan State University
August 2019 – June 2023
- Information and Communication Technology** | AMA Computer Learning Center
June 2017 – April 2019
